# Vadym Martseniuk

Frontend Developer

## SUMMARY

I am a developer with non-profit experience in web technologies. I have experience in creating websites and small web applications in which I used such technologies as HTML, CSS, and JavaScript.

I want to find a place where interesting and complex projects are developed using the latest technologies, to consolidate and improve development skills. I strive to write high-quality and clean code, as well as ready to support someone else's and outdated code.
